- BURMESE
- ENGLISH

PROGRAMMING SKILLS

- PHP and Laravel
- Java
- HTML, CSS
- React
- C#
- Python

ABOUT ME

"I have a strong foundation in HTML, CSS, and JavaScript, cultivated through academics and hands-on projects. This has honed my problem-solving skills and fueled my passion for web development. I specialize in building responsive, user-friendly interfaces and have experience working with modern frameworks like React.js and Laravel. My dedication to continuous learning drives me to stay updated with the latest web technologies, ensuring efficient and scalable solutions in every project I undertake."

EXPERIENCE

Myanmar Cyber Security Challenge   2023

I successfully tackled and conquered the top 7 challenges in the MCSC CTF competition, showcasing my adept skills in cybersecurity.

University Project Competition   2024

I had the honor of winning the first prize at the university project competition for my exceptional contribution to the Kids' Garden Project. This achievement highlights my dedication and innovative approach to creating engaging gaming and learning activities aimed at enhancing English proficiency across four key skills: reading, writing, speaking, and listening.

Government's Basic Literacy Project   2024

I also have experience in developing and managing the website for the government's Basic Literacy Project, "Wa Hta Ka La Tha." In this role, I played a key part in developing the project's website to improve accessibility and communication with our target audience. This experience not only enhanced my technical skills but also allowed me to contribute to the project's mission of promoting literacy and education effectively.

University Student Registration System   2025

Project Leader in University Student Registration System, responsible for system architecture, development, and team coordination to ensure a seamless and efficient registration process.
